One more thing Alternatively—and especially if you encounter problems getting HandBrake to work with your DVDs—you can use a separate app to decrypt your DVDs, leaving you with a Video_TS folder containing unencrypted files that HandBrake can then deal with easily.. (Both can also do some video conversion) Step two: Insert a DVD and pick what to rip Now insert your DVD into your Mac's DVD drive and launch HandBrake.. HandBrake is an open-source, GPL-licensed, multiplatform, multithreaded DVD to MPEG-4 converter, available for MacOS X, Linux and Windows.. Choose your DVD and click Open, and HandBrake then scans the DVD for the titles it contains.. (You should, of course, only rip DVDs that you've purchased) The first time you launch HandBrake and attempt to scan a DVD, the software will inform you that you need additional decrypting software and will offer to send you to a page where you can download the libdvdcss installer (currently, although you can always find the latest version).
